

## Air Cooled Facts

If a furnace required a high degree of heat to accomplish a given result, would you put a water-jacket around the furnace to cool it? Then why do it in an automobile?

A gasoline engine makes power by turning gasoline into heat. The hotter you can run it without igniting your lubricant, the greater efficiency you get out of your fuel.

The Franklin air-cooled motor normally runs at about 350 degrees, hot enough to get high efficiency out of the gasoline but cool enough to be well below the burning point of oil.

A water-cooled motor does not normally get hotter than 212 degrees; at that temperature the water boils away and there is trouble. Hence all water-cooled motors are under a heavy handicap, because they work at about 138 degrees below the point of maximum efficiency.

The Franklin motor car gets more actual going-power out of a gallon of gasoline than any other automobile. That means low running expense.

Franklin light-weight means tire-economy. Franklin construction—laminated wood frame and nickel steel parts—means repair-economy. Combine all these advantages and you have the motor car that you can afford to own.

Franklin Air-Cooled cars are run with the greatest of success for months in Summer in New York, Chicago and other places where the thermometer goes higher than it ever does in these islands, and they have proved the right car for the hottest as well as the coldest localities.

Ask the Honolulu users of Air-Cooled Franklins whether they keep cool on the hottest days or not. They will tell you.

### YOUNG RUNNER COZZENS

#### MAY BE CHAMPION

New York, March 5. — Athletic trainers, including Ernie H. Hjertberg of the Irish-American Athletic Club, believe they have found a quarter-mile runner who will one day beat the world's record.

Arthur H. Cozzens, a Brooklyn schoolboy, has done some great running, especially in relay races, for the Brooklyn Manual High School, and has never failed to defeat his rivals at this distance. Because of his speed the school holds a number of interscholastic records.

Cozzens is not yet 18 years old. In accordance with the advice of athletic trainers, he will not attempt to enter any of the big athletic clubs until he has reached an age where he will be better able to stand the hard training required of an all-around athlete.

### SWIMMERS TO FORM

#### AN ORGANIZATION

New York, March 7. — Pronounced interest in the swimming matches in Madison Square Garden during the past few days has given an impetus to the movement for organizing a swimming association, independent in itself, but subscribing to Amateur Athletic Union regulation. The plan has been discussed with much interest by the swimmers gathered to participate in the Sportsman's Show events, the idea as tentatively worked out being to organize a body which would devote its entire efforts to building up this one branch of sports.

### GEORGE FREETH IS LIFE-SAVER

#### Plunges Into Water And Brings Up Almost Lifeless Man

This astounding feat was accomplished by George Freeth, a Redondo, California, paper is self-explanatory. George Freeth was perhaps one of the best all-round athletes that Honolulu ever turned out. The Redondo paper says:

The Redondo plunge was the scene of a rather spectacular rescue on Washington's Birthday last, when Geo. Freeth, the well-known surf-board rider and swimmer, plunged into the water and brought Carl Bamly up from the bottom, almost lifeless. Mr. Bamly was finally brought around after some hard work and was able to go to his home in Los Angeles. The bravery of Freeth can not be spoken of too highly, as he had been up from a sick bed but two days, when he made the hazardous plunge, and was also hampered by wearing heavy clothing. Mr. Freeth is a member of the Diamond Head Athletic Club of Honolulu, H. I., and was one of the life-saving corps at Venice last summer.

When he was here Freeth made a great name for himself as an athlete in all branches of sport. This rescue is not the first one for him, either, for he has saved several other lives in the East. At one time in the East he saved three people from drowning.

Freeth was a member of the Diamond Head Athletic Club, and was a star player on both the football and baseball teams. He was a crack football player. His best stunt was, however, in the water. He was fast and strong, never seeming to tire. Fancy diving was an art with him, and it was no trick at all for the lad to leap from dizzy heights. As a surf-board rider he had no equal in the island, and it was for the purpose of teaching the people at the California beaches how to ride a board that he went to the Coast. At one time he was swimming instructor at the Hotel Baths.

### AMERICAN CAR HAS ADVANTAGE

Chicago, March 5. — Through a new ruling cabled from Paris yesterday, the American car entered in the New York to Paris automobile race has an opportunity to make a "runaway" of it after reaching Seattle. The race was so timed that all the racers could reach Seattle between March 8 and 10, when the boat to carry them across the water would sail. It was understood that those not there when the boat departed were disqualified.

When the bad roads and snow drifts were struck a "gentlemen's" agreement was entered into, whereby it was understood that every car should do its level best until March 5 or 6—just as it suited—and then cars should be sent by train to Seattle.

On the presumption that this agreement was still in effect, the Germans and the French did not hurry much in reaching Chicago, figuring that they could ship their cars from this city. They were, therefore, much chagrined last night upon receiving cable instructions to proceed to San Francisco under their own power and take a later boat out of San Francisco.

The Frenchmen left Chicago today and the Germans will depart Sunday.

### SPORTIVE SPLURGES

Diamond Head baseball team will practise this afternoon at Aala Park. Use of the league grounds probably may be had about the last of the week. The first practise game will then be arranged.

"If the Lady Maud is strictly a yawl-pigged boat, the Hawaii will have all the advantage in both rough and smooth weather," said a prominent yachting man this morning.

### PAT DONAHUE IS

#### SHIFTED AROUND

Word comes from the north that Pat Donahue will not have a trial with Boston after all. The American League club has turned him over to Toronto, where Sam Mertes will play. Criger and McFarland will be the main squeezes behind the plate for Boston this year. Pat won't like the shift a bit. He was anxious to go into the big bush, for he was ambitious to make a name for himself. As long as he was a minor leaguer he would have much preferred sticking with Portland.
